

**Manufacturers of Paint Arrestors**  
**Certified by Method 319**  
(6/14/99, w/ spelling correction 9/27/99)

OAQPS has received several calls in recent weeks asking if we know which manufacturers make paint arrestors (filters) that are in compliance with Method 319 as identified in §63.745 of the National Emission Standards for Aerospace Manufacturing and Rework Facilities.

Ingrid Ward (919-541-0300, ward.ingrid@epamail.epa.gov) sent out an *informal* request for information to some State/local, AIA and Contractor personnel. The following provides the results.

**THIS LIST SHOULD NOT BE CONSIDERED COMPLETE** as there are likely other manufacturers that also produce paint arrestors that have been tested elsewhere or will be tested in the near future.

**THIS LIST SHOULD NOT BE CONSIDERED AN ENDORSEMENT BY EPA.** This list is based only on feedback received and is being provided for informational purposes only. It has not been checked for accuracy. If you are a manufacturer and wish to be added to this list, or find an error, please contact Ingrid Ward.
